3. RATING METHODOLOGY

The Corporate Governance Compliance Rating is a system which audits whether or not the firm's management structures and management styles, the arrangements for shareholders and stakeholders and the process of informing in transparency and accuracy are performed in accordance with modern corporate governance principles and which assigns a grade corresponding to the existing situation.

Organization for Economic Co-operation and Development (OECD) established a working group in 1998 in order to assess member countries' opinions on corporate governance and to prepare some non – binding principles.

The fact that principles are open to change in time was also accepted at this work. Although at first these principles were focused on the companies whose shares were quoted in stock exchange, it was emphasized by OECD that it would be also useful to implement these principles in public enterprises and companies whose shares were not quoted in stock exchange.

In 1999, OECD Corporate Governance Principles were approved at the OECD Meeting of Ministers and published. Since then, these principles have been regarded as international references for the decision – makers, investors, shareholders, companies and stakeholders throughout the world.

Since their approval, these principles kept the concept of corporate governance on the agenda and became guidelines for the laws and regulations in OECD members, as well as other countries.

There are four basic principles of corporate governance in OECD Corporate Governance Principles. These are: fairness, transparency, accountability and responsibility.

Turkey has been closely monitoring these developments. A working group, established

within TUSIAD in 2001, prepared the guide, titled, "Corporate governance: The best implementation code". Then CMB issued "Capital Market Board Corporate Governance Principles" in 2003 and updated it in 2005, 2010, 2012, 2013 and 2014, according to international developments in this field.

Obligation to comply with CMB's Corporate Governance Principles, based on the principle of "implement or disclose", and to declare it became part of companies' lives in 2004. Putting the Declaration of Compliance to Corporate Governance in the annual reports became obligatory the following year.

The principles are grouped under four main headings namely: the Shareholders, Public Disclosure and Transparency, Stakeholders and the Board of Directors.

The Corporate Governance Compliance Rating Methodology has been prepared by Kobirate A.Ş. for companies whose shares are traded on BIST, banks, investment partnerships and non – quoted companies.

The methodology takes into consideration the criteria stated in CMB's Corporate Governance Directive, no II-17.1, dated January 3rd 2014; as well as CMB's board decisions taken at Board meeting dated 01.02.2013, no 4 / 105.

In this analysis, the full compliance of work flow and analysis technique with Kobirate A.Ş.'s Ethical Rules is considered.

In the process of rating, **398** criteria are considered to measure the compliance of BIST investment partnerships with the corporate governance principles.

Such criteria are translated into the Kobirate A.S.'s unique Corporate Governance Rating Questionnaire.

According to CMB's memorandum dated 12.04.2013 and numbered 36231672-410.99

(KBRT)-267/3854, the following rates are applied in the new Corporate Governance Compliance Rating:

Shareholders 25 %

Public Disclosure and Transparency 25 %

Stakeholders 15 %

Board of Directors 35 %

CMB has sent its notification dated 19.07.2013 and numbered 36231672-410.99 (KBRT) 452, on CMB decision dated 01.02.2013 and numbered 4/105 to our company, which required adding new questions into the methodology in order to ensure that good corporate governance principles, which go beyond meeting the minimum requirements of CMB issued good corporate governance principles – bringing 85 % of full points at most – will be included in the rating grade.

The 2014/2 revised corporate governance compliance rating methodology, created by our company, is restricted if the minimum conditions of corporate governance principles – declared in CMB notification of Corporate Governance dated 03.01.2014 – are met and all criteria is evaluated within same category. In this case all criteria are restricted to 85 % of the full points that the related criterion would get in that subsection. As the company applies and internalizes the criteria stated in corporate governance principles and our company finds out other good corporate governance criteria complied and practiced by the company; our rating system completes the section ratings to 100.

The grade to be assigned by the Corporate Governance Rating Committee to the firm ranges between 0-10. In this scale of grade, “10” points mean excellent, full compliance with CMB’s Corporate Governance Principles while grade “0” means that there is unsatisfactory compliance with CMB’s Corporate Governance Principles in the existing structure.
