## 2. RATING METHODOLOGY

The Corporate Governance Compliance Rating is a system which audits whether or not the firm's management structures and management styles, the arrangements for shareholders and stakeholders and the process of informing in transparency and accuracy are performed in accordance with the modern corporate governance principles and which assigns a grade corresponding to the existing situation.

Organization for Economic Co-operation and Development (OECD) established a working group in 1998 in order to assess member countries' opinions on corporate governance and to prepare some non – binding principles.

The fact that principles are open to change in time was also accepted at this work. Although at first these principles were focused on the companies whose shares were quoted in stock exchange, it was emphasized by OECD that it would be also useful to implement these principles in public enterprises and companies whose shares were not quoted in stock exchange.

In 1999, OECD Corporate Governance Principles were approved at the OECD Meeting of Ministers and published. Since then, these principles have been regarded as international references for the decision – makers, investors, shareholders, companies, and stakeholders throughout the world.

Since their approval, these principles kept the concept of corporate governance on the agenda and became guidelines for the laws and regulations in OECD members, as well as other countries. The Corporate Governance Principles, first announced by the OECD in 1999, were updated for the first time in 2004 and took their final form in Istanbul on April 10, 2015, during Turkey's G20 Presidency.

There are four basic principles of corporate governance in OECD Corporate Governance

Principles. These are: fairness, transparency, accountability, and responsibility.

Turkey has been closely monitoring these developments. A working group, established within TUSIAD in 2001, prepared the guide, titled, "Corporate governance: The best implementation code". Then CMB issued "Capital Market Board Corporate Governance Principles" in 2003 and updated it in 2005, 2010, 2012, 2013, 2014 and 2020 according to international developments in this field.

Obligation to comply with CMB's Corporate Governance Principles, based on the principle of "comply or explain", and to declare it became part of companies' lives in 2004. Putting the Declaration of Compliance to Corporate Governance in the annual reports became obligatory the following year.

The CMB has decided to create a new corporate governance reporting framework, and the new framework has been shared with the public with the Capital Markets Board Bulletin dated 10.01.2019 and numbered 2019/2 and the announcement dated 11.01.2019. Within the scope of the new reporting framework, it has been decided that the explanations will be made in the following order. Disclosure of the Compliance Report Format ("CRF") to report compliance with voluntary principles, and disclosure of the Corporate Governance Information Form ("CGIF") to provide information on current corporate governance practices. In accordance with the Turkish Commercial Code and the CMB's Corporate Governance Communiqué (II-17.1), CRF and CGIF must be announced on the Public Disclosure Platform at least three weeks before the date of the general assembly meeting, on the same date as the annual activity reports, and before the due date of the announcement period of the annual financial reports on the Public Disclosure Platform.

The Communiqué on Amending the "Corporate Governance Communiqué (II-17,1)" published in the Official Gazette numbered 31262 on

October 2, 2020, by the Capital Markets Board (II-17,1.a) and regulations regarding the voluntary sustainability principles compliance framework were included.

The compliance framework has been published on the Capital Markets Board website. The Sustainability Compliance Framework is examined under the Headings A- General Principles B- Environmental Principles C- Social Principles D- Corporate Governance Principles.

The practice has been determined according to the "Comply or Explain" principle. It is anticipated that the annual reports include whether the sustainability principles are applied or not, and if not, a reasoned explanation and an explanation of the effects that have occurred. In case of a significant change during the period, it is anticipated that the relevant change will be included in the interim annual reports.

The principles are grouped under four main headings, namely: the Shareholders, Public Disclosure and Transparency, Stakeholders, and the Board of Directors.

The Corporate Governance Compliance Rating Methodology revised on February 2022, has been prepared by Kobirate A.Ş. for companies whose shares are traded on BIST, banks, investment partnerships and non – quoted companies.

It has been prepared by considering Communiqué Amending the "Corporate Governance Communiqué (II-17,1) (II-17,1.a)" published in the Official Gazette No. 31262 on 02 October 2020 by the Board, as well as regulations regarding the voluntary sustainability principles compliance framework and the board decisions taken at the CMB's board meeting dated 01.02.2013 and numbered 4/105 in addition to the criteria specified in the "Corporate Governance Communiqué No. II-17.1" of the Capital Markets Board published in the Official Gazette dated 03 January 2014 and numbered 28871.

In this analysis, the full compliance of workflow and analysis technique with Kobirate A.Ş.'s Ethical Rules is considered.

456 criteria are used in the rating process for BIST 1st Group Companies in order to measure the compliance of firms with corporate governance principles. These criteria are translated into "Corporate Governance Rating Question Sets" through Kobirate A.Ş.'s unique software named as PERFECTRATE.

The weighting scheme for the four main sections in the new Corporate Governance Compliance Rating, determined by CMB's memorandum dated 12.04.2013 and numbered 36231672-410.99 (KBRT)-267/3854, is applied completely by Kobirate A.Ş. The weightings are as below:

Shareholders 25 %  
Public Disclosure and Transparency 25 %  
Stakeholders 15 %  
Board of Directors 35 %

CMB decision dated 01.02.2013 and numbered 4/105 states that in case the minimum requirements of corporate governance principles are met, 85 % of full points can be given at most for that principle and it is required to add new questions / methods into the methodology in order to ensure that good corporate governance principles, which go beyond meeting the minimum requirements are included in the rating grade. Our company has been informed about this requirement by CMB notification dated 19.07.2013 and numbered 36231672-410.99 (KBRT) 452.

In the FEBRUARY 2022 revised corporate governance compliance rating methodology, created by our company, the grade that can be given to a related criterion in that subsection for meeting minimum requirements of corporate governance principles, stated by CMB Communiqué of Corporate Governance published on 03.01.2014 is restricted to 85 % of the full points.

A rating is made with a system that completes the section grades up to 100 by the company's

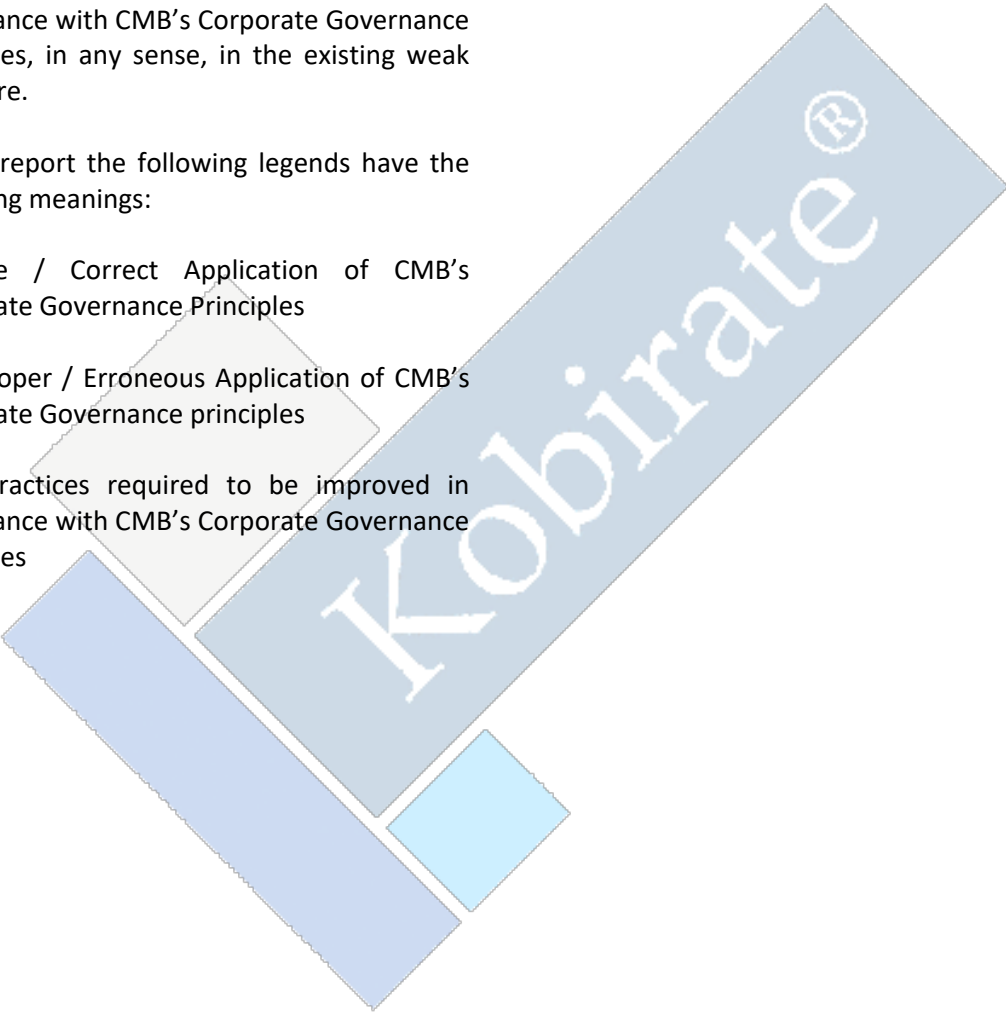

compliance and implementation of the corporate governance practices, which include the good implementation and internalization of the criteria determined in the corporate governance principles, and the different good corporate governance practice criteria determined by our company.

The grade to be assigned by the Corporate Governance Rating Committee to the firm ranges between 0-10. In this scale of grade, "10" points mean excellent, full compliance with CMB's Corporate Governance Principles while grade "0" means that there is no compliance with CMB's Corporate Governance Principles, in any sense, in the existing weak structure.

In this report the following legends have the following meanings:

- ✓ Due / Correct Application of CMB's Corporate Governance Principles
- ✗ Improper / Erroneous Application of CMB's Corporate Governance principles
- ✓/✗ Practices required to be improved in compliance with CMB's Corporate Governance Principles

***Information about Company Activities***

One of the OYAK Mining Metallurgy Group companies, İsdemir is our country's third oldest integrated iron and steel plant by its establishment date and the largest by its long product manufacturing capacity. İsdemir is Turkey's only integrated plant that produces long and flat products with a hot rolling capacity of 3.5 million tons/year commissioned in 2008.

İsdemir was established on 3 October 1970 by the Mediterranean coast in the south of Turkey, in Payas (Yakacık), 17 km to İskenderun. At the time, the plant was founded on a total area of 16.75 million m<sup>2</sup>, including social facilities (plant's area: 6.8 million m<sup>2</sup>).

Commissioned in 1975 with a steel bloom production capacity of 1.1 million tons/year, İsdemir's production capacity was increased with a plant extension to 2.2 million tons/year as of 1985.

Founded to produce long products such as pig iron, blooms, billets and reinforcing bars at international standards, İsdemir uses coke – sinter – blast furnace – steelworks – continuous casting and hot rolling processes for production

Products are sold to the national market and exported all over the world, primarily to Southern Europe and Middle Eastern countries

Thanks to Modernization and Transformation Investments (MTI), İsdemir started to produce flat products in addition to long products as of August 2008.

Playing a major role in increasing the production capacity for flat products, which are vital for development of the Turkish steel industry, İsdemir produces billets, wire rod, hot rolled coils, slab and pig iron. In addition to these products, byproducts including coke, oxygen, nitrogen, argon, ammonium sulfate, granulated slag, tar and benzol are also produced.

All shares of İsdemir were transferred to Erdemir by the Turkish Privatization Administration with a Share Transfer Agreement dated 31 January 2002, on the condition that investments would be made for the transition to flat production. Following the acquisition of Erdemir by Oyak, İsdemir started to operate under OYAK as of 27 February 2006. Currently, 94,87% of İsdemir shares are owned by Erdemir and 5,13% by other shareholders.

Continuous development and making a difference in products and services by using novel technologies with a consciousness for the environment is a main principle for İsdemir, which completed its Modernization and Transformation Investments (MTI) that had started in 2004 and increased its initial liquid steel capacity of 2.2 million tons/year to 5.3 million tons/year. It also has an installed production capacity of 3.5 million tons/year for flat products, 0.6 million tons/year for coils and 2.5 million tons/year for billets as finished products.

Today, İsdemir is the country's only integrated flat steel producer that is capable of producing both flat and long products.

In this subsection İsdemir has achieved a very good compliance with corporate governance principles.

***b. Principles of Activity of the Board of Directors***

It is our impression that İsdemir Board of Directors conducts its activities in an open, accountable, fair, and responsible fashion.

The distribution of responsibilities among board members, as well as their duties and powers are disclosed to public in the annual report.

The Board of Directors has established internal control systems, including risk management and information systems and processes, which can minimize the effects of risks that may affect the company's stakeholders, especially the shareholders. It has been learned that the Board is reviewing the effectiveness of risk management and internal control systems.

No person in the Company has the authority to decide solely and in an unrestricted fashion. Positions of Chairman of the Board and CEO are hold by different individuals.

It is thought that Board of Directors plays a leading role in the maintenance of effective communication and in easing and resolving

disputes that might arise between the company and the shareholders. To this end, the Board is in close cooperation with the Corporate Governance Committee and Investor Relations Department.

Manager Liability Insurance against defects of Board Members duties has been made but it does not exceed 25% of the company's capital.

Regarding this subsection, it has been determined that the company has achieved a good compliance with the Corporate Governance Principles.

***c. Structure of the Board of Directors***

Company's Board of Directors is formed with 9 (nine) members; including 1 (one) Chairman and 8 (eight) members. The requirement of having at least 5 (five) members to form the Board has been met and the number of Board Members found sufficient to serve effectively and constructively and to form and efficiently organize activities of committees.

7 (seven) Board members are non – executives, while 2 (two) of them are executives. 3 (three) members are independent members who satisfy the independence criteria laid down by the Corporate Governance Principles.

The independent members of the Board of Directors submitted their written statements regarding their independence to the Nomination Committee within the framework of the criteria set out in the legislation, articles of association and principles. The Nomination Committee has submitted its evaluations regarding the candidate's proposals for independent membership and whether the candidate fulfills the independence criteria to the Board of Directors for approval. The Board of Directors approved the proposed nominees and submitted them to the CMB for comment. Upon the CMB's failure to express a negative opinion, the finalized list of independent member candidates was announced to the public together with the General Assembly meeting announcement. It would be

appropriate for the company to pay attention to the time constraints specified in the principles during these processes.

There are 2 (two) female members in the Board of Directors, which corresponds to 22% of the number of members. This structure does not comply with the "not less than 25%" criterion determined by the CMB as the rate of female members in the board of directors. It is expected that the company will set a target rate and target time for female members in the board of directors, not less than 25%, establish a policy to achieve these targets, and the board of directors will annually evaluate the progress made in achieving these targets.
